

## E-greeting

I am so excited and take great pleasure in announcing a new service that I am offering immediately. I am now a licensed "Smart Women Buy Homes" advisor.

Today one out of five homes is being purchased by single women. There are very few realtors specializing and helping these women through the home purchasing or selling process. They too can achieve the "American Dream" of home ownership with my help.

If you know someone that I might be able to assist please contact me or give them my information.
